29th International NO DIG

The **29th International NO DIG** world congress and exhibition on trenchless technology will be held in **Berlin** on **2-5 May 2011**.

No-Dig construction is a pioneering technology that combines economic efficiency and environmental protection into a modern approach for installing underground supply lines used for drinking water, wastewater, gas, heating, telecommunications or electricity.

Gain new insight into today's cutting-edge, no-dig technology on Construction Site Day! As one of the top events at WASSER BERLIN INTERNATIONAL, NO DIG brings together specialists from all over the world and offers a wealth of opportunities to discuss theory and practice with industry experts.
